PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with hands-on experience in Python development, ML model deployment, and REST API design. Delivered end-to-end ML solutions — from data preprocessing to production deployment — during an AI/ML internship at IBM India and across multiple shipped projects. Seeking Software Developer, AI/ML Engineer, or Data Analyst roles.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Frontend:** HTML5, CSS3, Bootstrap, Responsive UI Design, Web Speech API.
- **Backend:** Flask, RESTful API Design, Object-Oriented Programming, Data Structures & Algorithms.
- **Databases:** MySQL, MongoDB — Schema Design, CRUD Operations, Query Optimization.
- **ML / AI:** Scikit-learn, NLP, TF-IDF, Bag-of-Words, NLTK, SMOTE, Supervised Learning, Feature Engineering, Random Forest, Logistic Regression.
- **DevOps / Tools:** Git, GitHub, Vercel, Serverless Deployment.

EDUCATION

Bachelor of Technology — Computer Science & Engineering **2022 – 2026**
Dr. APJ Abdul Kalam Technical University

Class 12 (CBSE) | 86.4% **2022**
Vanita Public School, Varanasi

Class 10 (CBSE) | 89.0% **2020**
Vanita Public School, Varanasi

PROJECTS

FOX-Assistant – AI-Powered Voice Web Application | GitHub | Live Demo
HTML5, CSS3, JavaScript, Web Speech API **Jan 2026 – Apr 2026**

- Engineered a fully voice-driven AI web assistant with wake-word activation, real-time speech recognition, and text-to-speech output — achieving natural conversational interaction without any third-party dependencies.
- Designed a modular command-processing architecture that integrates the Wikipedia REST API and Google Maps for live information retrieval and navigation, enabling multi-domain voice commands.
- Deployed a zero-dependency, cross-device responsive UI with a glassmorphism design system on Vercel; ensured compatibility across desktop and mobile browsers.

HeartSense – Heart Disease Prediction Web App | GitHub | Live Demo
Python, Flask, Scikit-learn, HTML/CSS, Bootstrap **Oct 2025 – May 2026**

- Owned the complete ML pipeline: performed data preprocessing, trained and serialized a Random Forest classifier (Scikit-learn), and achieved 85%+ prediction accuracy on a clinical heart disease dataset.
- Built a Flask REST backend to serve model inference and a responsive Bootstrap front-end for data entry and result display — delivering a fully integrated, user-facing medical prediction tool.
- Maintained the live deployed application, demonstrating the ability to ship and sustain a production-grade full-stack ML product independently.

Sentiment Analysis Application | GitHub | Live Demo
Python, Flask, Scikit-learn, NLTK **May 2025 – Jul 2025**

- Built a production-ready Flask REST API and web interface for real-time sentiment classification (Positive / Neutral / Negative) of product reviews using an NLP pipeline with TF-IDF vectorization and Logistic Regression.
- Applied SMOTE-based class balancing and custom text preprocessing (NLTK) to improve model robustness on imbalanced review datasets, resulting in measurably higher precision on minority sentiment classes.
- Deployed on Vercel via a serverless architecture, connecting a lightweight front-end to a backend inference API with low-latency response.

PROFESSIONAL EXPERIENCE

Software Engineering Intern – AI/ML
IBM India Pvt. Ltd. **May 2025 – Jul 2025**

- Delivered end-to-end supervised ML workflows — data preparation, feature engineering, model development, cross validation, and performance evaluation — on real project datasets using Python and Scikit-learn.
- Collaborated within a corporate engineering environment, following industry-standard ML practices including reproducible pipelines and model validation protocols.
- Produced a deployable sentiment analysis REST API (Flask + TF-IDF + Logistic Regression + SMOTE) that classifies product reviews as Positive, Neutral, or Negative in real time; shipped to Vercel using serverless architecture.

Core Java Trainee
United College of Engineering and Research **Jun 2023 – Aug 2023**

- Completed 60+ hours of intensive Core Java training covering OOP principles, data structures, exception handling, and collections — establishing a strong foundation for backend and systems development.

CERTIFICATIONS

- Oracle Certified Foundations Associate (Agentic AI) – Oracle University
- Fundamentals of Prompt Engineering with Claude – AWS Training & Certification
- Claude 101 – Anthropic
- AI/ML Virtual Internship Certification – IBM India Pvt. Ltd.
- MongoDB Developer's Toolkit – CRUD Mastery – GeeksforGeeks
- Python Programming Certification – GUVI × HCL
