PROFESSIONAL SUMMARY

Computer Science and Engineering graduate skilled in software development, Artificial Intelligence, Machine Learning, Data Analytics, and problem solving. Proficient in building Python-based applications, machine learning models, REST APIs, and LLM-powered conversational AI solutions. Seeking Software Developer, AI/ML Engineer Intern, or Data Analyst opportunities.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript, Bootstrap, Responsive UI, Web Speech API

Backend: Flask, RESTful API Design, Object-Oriented Programming, Data Structures

Databases: MySQL, MongoDB, Schema Design, CRUD Operations, Query Optimization

Applied ML: Scikit-learn, NLP, TF-IDF/BoW, NLTK, Supervised Learning, Feature Engineering

Tools & Deployment: Git, GitHub, Vercel, Serverless Deployment

PROJECTS

FOX-Assistant: AI-Powered Voice Web Application

Jan 2026 - Apr 2026

HTML, CSS, JavaScript, Web Speech API

- Built a voice-powered AI assistant end-to-end in HTML, CSS, and JavaScript using the Web Speech API, delivering wake-word activation, speech recognition, and text-to-speech for natural voice interaction.
- Designed a modular front-end command-processing architecture integrating the Wikipedia REST API, Google Maps, and browser automation for real-time information retrieval and navigation.
- Built and shipped a zero-dependency, responsive UI with a modern glassmorphism design, deployed on Vercel with cross-device compatibility.

HeartSense: Heart Disease Prediction Web App

Oct 2025 - May 2026

Python, Flask, Scikit-learn, HTML/CSS, Bootstrap, Machine Learning

- Built a full-stack web application end-to-end: trained and serialized a Random Forest classifier (scikit-learn), exposed it through a Flask REST backend, and built an interactive HTML/CSS/Bootstrap front-end.
- Owned the complete pipeline from data preprocessing through model serialization to deployment, achieving over 85% prediction accuracy.
- Deployed and maintained the live application, demonstrating the ability to ship a working product from backend logic to user-facing interface.

Sentiment Analysis Application

May 2025 - Jul 2025

Python, Flask, Scikit-learn, NLTK

- Built a Flask-based REST API and responsive web interface to classify product reviews as Positive, Neutral, or Negative in real time.
- Implemented an end-to-end NLP pipeline: text preprocessing, TF-IDF vectorization, Logistic Regression, and SMOTE-based class balancing, to improve prediction accuracy and robustness.
- Deployed the application on Vercel using a serverless architecture, connecting front-end requests to the backend inference API.

EXPERIENCE

Software Engineering Intern (AI/ML) | IBM India Pvt. Ltd.

May 2025 - Jul 2025

- Worked on supervised machine learning projects, performing data preparation, model development, validation, and performance evaluation using Python, Scikit-learn, and standard ML workflows.

Core Java Trainee | United College of Engineering and Research

June 2023 - August 2023

- Completed 60 hours of summer training in Core Java, gaining practical knowledge of Java programming fundamentals and object-oriented programming concepts.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) | Dr. APJ Abdul Kalam Technical University

2022 - 2026

Class 12, CBSE | Vanita Public School, Varanasi | 86.4%

Class 10, CBSE | Vanita Public School, Varanasi | 89%

CERTIFICATIONS

- **Fundamentals of Prompt Engineering with Claude:** AWS Training & Certification.
- **Claude 101:** Anthropic.
- **AI/ML Virtual Internship Certification:** (IBM India Pvt. Ltd.)
- **MongoDB Developer's Toolkit - CRUD Mastery:** GeeksforGeeks.
- **Python Programming Certification:** GUVI (HCL Collaboration).
